

OSHA COMPLIANT LOADING BRIDGE FALL PROTECTION

Airport Bridge Company, Inc.
Manufacturing & Installation

East Island Aviation Services, Inc.
Global Sales & Market Development

Features

- ❖ **Dual lifelines for two mechanics**
- ❖ **No moving parts**
- ❖ **Easy one day Installation**
- ❖ **Mounts on any Passenger Bridge**
- ❖ **Little or no maintenance**
- ❖ **Meets all OSHA standards**
- ❖ **Provides both fall protection and fall arrest**
- ❖ **Most cost effect solution on the market and ready to ship**

Our fall protection system was designed with the user in mind. Unlike other systems it requires little or no training, maintenance, adjustment and it is easy to use. Clip on and go. We thought this was critical not only for the people using it but for the management of those people. We feel that if it is easy for users they will use it. We all know what can happen if it is not used. The simplicity of the system also allows subcontractors and other trades that may need to be on the bridge to use it without a mechanic to do anything but explain how it works and what to do. Maintenance consists of nothing more than visual inspections.

Meets all the following OSHA Regulations:

OSHA standard 1926.500., 1926.502 (a)(2), 1926.502(d)(1), 1926.502(d)(2), 1926.502(d)(3) 1926.502(d)(4), 1926.502(d)(5), 1926.502 (d)(6), 1926.502(d)(6)(i), 1926.502(d)(6)(ii), 1926.502(d)(1) through (d)(6)(v), 1926.502(d)(6)(iii), 1926.502(d)(6)(iv), 1926.502(d)(6)(v), 1926.502(d)(7), 1926.502 (d)(8), 1926.502(d)(9), 1926.502(d)(14), 1926.502(d)(15), 1926.502(d)(15)(i), 1926.502(d)(15)(ii), 1926.502(d)(16)
